

POWER START ASSIST

HAND PALLET TRUCK

OUTMUSCLES HEAVY LOADS FROM THE START

The Power-Start Technology on the PST23 minimizes the starting resistance even when the truck is heavily loaded. With a simple design, the truck assists the operator without the use of a battery or motor. Just pump the towbar a few times and you can move even the maximum load in any direction.

ERGONOMICS

Take a load off. The Power-Start Technology helps you maneuver your load so you can focus on steering instead of towing.

PRODUCTIVITY

Let the PST23 do the work for you. It's engineered to help you handle loads with little effort while increasing efficiency. The Power-Start Technology reduces starting resistance even when the truck is heavily loaded. Squeeze the handgrip, pump the towbar and the truck will automatically move in the direction you want. When the handgrip is pressed downward, and the towbar is raised, the truck will move in the direction of the forks.

Powerthane, load rollers

Travel direction selected by adjusting the handgrip on the towbar

One-piece leak-proof cast hydraulic pump

Durable powder coat paint finish
